Check this website to determine if your state has a SPOC and for contact information:

Column 1 - Identify the operational service center site(s) and the service territory over which the service operates. For each service center site, show its precise address and provide a brief description of the nature of the facility. If the only address available for a site is a PO Box, Star Route, or other address not recognized by Census Factfinder, give that address supplemented by the precise latitude and longitude (DD/MM/SS or DD.DDD). For example, an ambulance service would show the address of and describe its emergency vehicle operations center. A visiting nurse project would show the central hospital or VNA offices from which it operates the service. For the service territory, attach a detail map (preferably a Census Urban Area Map zoomed appropriately, but you may supplement that with other maps if you wish) to which you have "penciled-in" the location of the service center and the defined boundary within which the service is offered from that center. (If the service territory is not defined, we cannot score the application, which makes it ineligible for funding.) Enter a narrative description of the service territory using as many blocks as appropriate to describe it and to show the information relevant to the described territory in columns 3, 4, & 5. If the service operates multiple, autonomous, and operationally independent territories, show each physical service center and its associated service territory separately. (See the Application Guide for information about documenting your service territory for purposes of the grant application.)

Columns 2 & 3 - Show the relevant County and Congressional District Data associated with the sites and territory listed.

Enter every population center in which you provide your service in column 1. Place each Census Urbanized Area (UZA) and Census Urban Cluster (UC) on an individual line and include data printouts from the Census showing the population of each such area to support the population you enter in column 3. If you serve the entire urban area, show the entire urban population in column four. If you serve only part of an urban area, enter that portion in Column 4. Enter the entire Census Rural (below 2500) population of the service territory on one line and show census data sheets to support that number. Show the census designation of the population center in column 2 and enter the appropriate points from the table above in column 5. Enter the product of column 4 times column 5 in column 6. You must include the entire population of each Urbanized Area (UZA) and Urban Cluster (UA) in which you provide your service in column 4 unless you demonstrate that your defined service territory excludes part of the UZA or UC.
